

Call for Journal Presentations

To foster the participation of representatives from both industry and academia who might otherwise be unable to contribute to IWAENC 2026, this initiative offers the opportunity to present recent journal work to the IWAENC community.

IWAENC 2026 invites researchers to submit requests for the presentation of recently published journal papers in research areas aligned with the scope of the conference. Presentations of accepted journal papers will take place in **poster format**, as for the other papers presented at IWAENC 2026.

Topics

Topics of interest include, but are not limited to:

- Speech and audio enhancement, including noise reduction, echo and feedback control, dereverberation, and intelligibility improvement
- Microphone array processing, source localization and tracking, source separation, diarization, and speaker extraction
- Spatial audio, acoustic scene analysis, acoustic event detection, and acoustic environment modelling
- Robot audition, acoustic sensor networks, active noise control, and hearing-assistive technologies
- Speech and audio coding, analysis, synthesis, quality assessment, datasets, and evaluation methodologies
- Multimodal, machine learning-based, and emerging approaches for speech, audio, and acoustic signal processing

Eligibility

Journal papers are eligible for presentation if they meet the following criteria:

- The paper has been published **from July 2025 onward**.
- The paper falls within the scientific scope of **IWAENC 2026**.
- The person submitting the presentation request is also the person who will present the paper at the conference.

Exceptions to this requirement may be granted in well-motivated cases. Any such request should include a clear justification.

Selection Process

As the number of available presentation slots is limited, it may not be possible to accept all requests.

A preliminary selection will be carried out based on the relevance of the submitted journal papers to the scope of IWAENC 2026. The remaining requests will then be ranked according to the following criteria:

- Higher priority will be given to presentations by researchers who are **not authors of papers included in the IWAENC 2026 proceedings**.
- Presentations by **students** will be favored.

19 th International Workshop on Acoustic Signal Enhancement

IWAENC 2026
Cremona, Italy

Registration

Presenters of accepted journal papers must register for IWAENC 2026 according to the same registration rules and conditions as all other conference participants. **A full registration is required in order to present the paper.**

An **extension** of the early-bird registration deadline to **August 8, 2026** is granted exclusively to journal paper **presenters who are not authors of other papers included in the IWAENC 2026 proceedings.**

Submission of Requests

Requests for journal paper presentations must be submitted through the following link:

<https://cmt3.research.microsoft.com/IWAENC2026/Track/3/Submission/Create>

Important Dates

- **July 14, 2026** — Deadline for submitting requests for journal paper presentations
- **July 21, 2026** — Notification of acceptance
- **August 8, 2026** — Extended early-bird registration deadline for eligible journal paper presenters
